## PROJECTS

### SPEECHO

- A web app that generates a **sentimental analyzed** report and displays it in form of **emojis** from given user's text.
- Implemented an **AI** technology (**IBM Watson**) to provide analyze and preform feedback on the input.
- Used **NodeJS** and **Express** to build the back-end.

### BALL FLIP!

- Fast paced casual **Android** game that tests the user's focus.
- Active listing on the Google **Play Store** for **379+** days.
- Built with assets provided by the **Unity Game Engine** and applied **Google Play Services API** for better Android integration with the game.

### RESTARTUP

- Full stack app made with **MongoDB, Express, React** and **NodeJS**
- Used **CSS Grid** and **Bootstrap** to make it responsive and mobile-friendly.
- Utilized **HTTP request** methods to fetch and manipulate data from the response.

## EDUCATION

### Bachelor of Applied Science in Computer Science – Co-op

*McMaster University, Hamilton / September 2019 – Present*

- Currently enrolled full time in Computer Science **Co-op** program.
- Enrolled in relevant CS classes and an **Artificial Intelligence**

### International Business and Technology (IBT) Diploma

*North Park Secondary School, Brampton / September 2015 – June 2019*

- Enrolled in specialized courses that cover taught various essential software and hardware skills.
- Learned key **leadership skills** and experience by applying them in various events for younger students.
